## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 51-76 are rejected under 35 U.S.C. 102(b) as being anticipated by Applicant's cited prior art (U.S. Pat. No. 5,752,148 to Yoneda et al).

Yoneda et al discloses an image forming apparatus comprising a heat generating member 15d (Fig. 10); a pressure member 6; a magnetization coil 3d for heating the heat generating member by electromagnetic induction; an inverter circuit 12 for supplying high frequency current; a control unit 13 for controlling operation of the inverter circuit; and a temperature sensor 9 for detecting a temperature of the heat-generating member, wherein both the temperature sensor and a nip portion (Fig. 6, nip area between fix roller 31 and pressure roller 6) formed between the heat generating member and the pressure member are arranged at a portion outside of a portion of the heat generating member that is heated most by the magnetization coil (Col. 7, lines 39-43 and Fig. 10).

Yoneda et al further discloses the temperature sensor is positioned in the vicinity of the nip portion on a heat generating member side and upstream side from the nip portion in a conveying direction of the recording sheet (Fig. 10); the magnetization coil is

arranged in opposition to an outer peripheral surface of the heat-generating member (Fig. 10).
